On 19 November 2015, The Royal Bank of Scotland plc (with its registered office at 36 St Andrew Square, Edinburgh, Scotland) (“**RBS**”) and BNP Paribas S.A. (incorporated in France and with its registered office at 16, Boulevard des Italiens, 75009 Paris, France) (“**BNPP**”), acting through its London Branch, announced that the Court of Session in Scotland had approved and sanctioned the implementation of a banking business transfer scheme, whereby certain assets and liabilities related to RBS’s structured retail investor products and equity derivatives business would be transferred to BNPP pursuant to Part VII of the UK Financial Services and Markets Act 2000 (the “**Part VII Scheme**”).

The Part VII Scheme took effect on 7 December 2015 (the “**Effective Date**”).

On the Effective Date, BNPP, acting through its London Branch, became the issuer of those securities originally issued by RBS that were transferred pursuant to the Part VII Scheme. Immediately after the transfer of those securities to BNPP, acting through its London Branch, the role of the issuer under those securities was transferred, also under the terms of the Part VII Scheme, to BNPP IBV, a wholly owned subsidiary of BNPP. As part of the Part VII Scheme, BNPP guarantees all the obligations of BNPP IBV arising in respect of the transferred securities.

Under the Part VII Scheme, amendments were made to the terms of the transferring securities and to agreements related to them from the Effective Date in order to give effect to the Part VII Scheme, including (but not limited to) references to “RBS”, in its capacity as issuer of the transferred securities, being construed as references to “BNPP IBV”.

Details of the securities that have transferred under the Part VII Scheme as well as further information on the Part VII Scheme generally can be viewed at <http://warrants.bnpparibas.com/>

##### Investment risks

The price of the Securities may fall in value as rapidly as it may rise and investors may not get back the amount invested. The price of the Securities may be affected by a number of factors, including changes in the value and volatility of the underlying asset(s), the creditworthiness of the Issuer, changes in foreign exchange rates and economic, financial and political events that are difficult to predict. The past performance of an underlying asset or other security or derivative should not be taken as an indication of the future performance of that underlying asset or other security or derivative during the term of the Securities. Owning the Securities is not the same as owning the underlying asset(s) and changes in the market value of any underlying asset may not necessarily result in a comparable change in the market value of the Securities. Investors should further note that they bear the Issuer's solvency risk. For a full description of the Securities including risks, costs and product conditions, as applicable, please refer to the offering materials, Prospectus, Base Prospectus and/or final terms, as applicable.

##### Suitability of the Securities

The purchase of the Securities involves certain risks including market risk, credit risk and liquidity risk. Investors should ensure that they understand the nature of all these risks before making a decision to invest in the Securities. Investors should carefully consider whether the Securities are suitable for them in light of their experience, objectives, financial position and other relevant circumstances. If in any doubt, investors should obtain relevant and specific

professional advice before making any investment decision. In structuring, issuing and selling the Securities, the Issuer is not acting in any form of fiduciary or advisory capacity.

#### Proposed Transfers

The Royal Bank of Scotland Group plc (**RBSG**) and its subsidiaries consolidated in accordance with International Financial Reporting Standards (the **RBSG Group**) is in the course of implementing an extensive restructuring of its businesses, operations and assets, including those of the Issuer and its consolidated subsidiaries (the **Group**) and other members of the RBSG Group, and may, in the future, consider making further changes to its business, operations, structure and assets. In particular, on 19 April 2011, the boards of RBSG, RBS plc, RBS Holdings N.V. and the Issuer announced that they had approved the proposed transfers of a substantial part of the business activities of the Issuer to RBS plc (the **Proposed Transfers**), subject, among other matters, to regulatory and other approvals, further tax and other analysis in respect of the assets and liabilities to be transferred and employee consultation procedures. It was also announced that it was expected that the Proposed Transfers would be implemented on a phased basis over a period ending on 31 December 2013 and that a large part of the Proposed Transfers (including the transfers of certain securities issued by the Issuer) was expected to have taken place by the end of 2012. Where available and practicable, statutory transfer schemes will be used to implement the Proposed Transfers. It is expected that these will include a banking business transfer scheme in respect of eligible business carried on by the Issuer pursuant to Part VII of the UK Financial Services and Markets Act 2000 (**the Part VII Scheme**). Implementation of the Part VII Scheme will be subject (amongst other matters) to court and regulatory approval.

This termsheet indicates whether or not RBS plc is expected to become the issuer of the Securities as a result of the Part VII Scheme (subject to the Securities not having been exercised, redeemed or repurchased and cancelled prior to the implementation of the Part VII Scheme). If the termsheet indicates that RBS plc is not expected to become the issuer of the Securities as a result of the Part VII Scheme, the expectation is that the Issuer will remain the issuer of the Securities and that RBS plc will not become the issuer of the Securities pursuant to the Proposed Transfers generally.

RBSG is committed to providing all the necessary support to ensure the Issuer continues to meet its commitments during and after the Proposed Transfers. Nevertheless, it is possible that the Proposed Transfers might have a material adverse impact on the Group's business, financial condition, results of operations and prospects, and an adverse impact on the Issuer's credit ratings, and may also negatively impact the value of the Securities. If RBS plc were to become the issuer of the Securities, the fact of such change of issuer and/or the fact that RBS is a Scottish incorporated company might impact holders of the Securities, whether for tax reasons or otherwise. For further information see the press releases entitled "Proposed transfers of a substantial part of the business activities of the RBS N.V. to RBS plc" published by the Issuer on 19 April 2011 and "Securities issued by RBS N.V.: Proposed change of issuer from RBS N.V. to RBS plc" published by the Issuer on 21 July 2011. The press release entitled "Details of Part VII Scheme-Securities issued by RBS N.V." published by the Issuer on 22 July 2011 also includes details of the amendments which are expected to be made to the terms of securities issued by the Issuer as a result of the Part VII Scheme. Investors should review those which may be relevant to the Securities.

Investors should not place any reliance on the indication in this termsheet as to whether RBS plc is or is not expected to become the issuer of the Securities as a result of the Part VII Scheme, when making an investment decision or for any other purpose, and investors should be aware that changes to the proposals for the Proposed Transfers (including, without limitation, to the identity of the securities in respect of which RBS plc may become the issuer, the eventual manner in which the change of issuer is proposed to be effected, to the timing for such change or any other details of the Part VII Scheme) may be made if required, or if determined by the Issuer or RBS plc (in their absolute discretion) to be desirable for commercial or other reasons. Accordingly, nothing in this termsheet or any other document relating to the Securities should be taken as (or is) a representation that RBS plc will become, or the Issuer will remain, the issuer of the Securities, whether in the manner described in this termsheet, in accordance with the timing set out in this termsheet, or at all. If prospective purchasers are in any doubt as to whether there is any tax or other impact on them as a result of the Proposed Transfers (including the Part VII Scheme), they should discuss such matters with their advisers.

#### Creditworthiness of Issuer

The Securities constitute general unsecured contractual obligations of the Issuer and of no other person. Investors in the Securities are relying upon and are exposed to the creditworthiness of the Issuer. If the Issuer fails to make a payment or becomes insolvent you could lose some or all of your investment.

#### Secondary market trading

No assurance can be given that any trading market for the Securities will exist or whether any such market will be liquid or illiquid. The Issuer will use reasonable endeavours, under normal market conditions and its own discretion, to provide a bid/offer price for the Securities and will indicate at the time of providing the quotation how long such quotation will remain actionable, or, in any event, not longer than what the Issuer considers a commercially reasonable time. The Issuer will not be required to provide a bid/offer price if an event or series of events occurs outside the Issuer's control (whether or not affecting the market generally) resulting in, amongst other things, (i) the unscheduled closing (ii) any suspension or (iii) the disruption of any (a) physical or electronic trading system or market affecting the Securities or (b) computer, communications or other service system used by the Issuer to generate a quotation in respect of the Securities. The Issuer may determine a bid/offer price in a different manner than other market participants and prices can vary. Sometimes this variance may be substantial. If the Securities are not traded on any exchange, pricing information may be more difficult to obtain and the liquidity and price of the Securities may be adversely affected. The bid/offer spread will be subject to the Issuer's discretion. Any market making activity commenced may be discontinued at any time.

#### Conflicts of interest

The Issuer and its affiliates, connected companies, employees, officers or clients may from time to time have an interest in financial instruments of the type described in this termsheet and/or related financial instruments and such interests may include: (i) having long or short positions in the Securities, the underlying asset(s) or other securities or derivatives that may affect the value of the Securities; and/or (ii) possessing or acquiring material information about the Securities, the underlying asset(s) or other securities or derivatives that may affect the value of the Securities; and/or (iii) otherwise dealing, trading, holding, acting as market-makers in such securities or instruments. The Issuer may at any time solicit or provide investment banking, commercial banking, credit, advisory or other financial services to the issuer of any underlying asset or to any other company or issuer of securities or financial instruments referred to herein. Such activities and information may cause consequences that are adverse to the interests of the investors in the Securities or otherwise create various potential and actual conflicts of interest. The Issuer has no obligation to disclose such activities or information or other potential and actual conflicts of interest and may engage in any such activities without regard to the interests of the investors in the Securities or the effect that such activities may directly or indirectly have on the Securities.

#### Hedging activities

Notwithstanding any communication that you may have had with the Issuer in respect of the manner in which the Issuer may establish, maintain, adjust or unwind its hedge positions with respect to the Securities: (i) the Issuer may in its absolute discretion determine when, how or in what manner it may establish, maintain or adjust or unwind its hedge positions; (ii) the Issuer may, but is not obliged to, hedge the Securities dynamically by holding a corresponding position in the underlying asset(s) or any other securities, derivatives or otherwise and may hedge the Securities individually or on a portfolio basis; and (iii) any hedge positions are the proprietary trading positions of the Issuer and are not held on your behalf or by the Issuer as your agent.

#### Early termination

The Issuer may terminate the Securities if it determines that it has become unlawful for the Issuer to perform its obligations under the Securities or its ability to source a hedge or unwind an existing hedge in respect of the Securities is adversely affected in any material respect. If the Issuer terminates the Securities early, the Issuer will, if and to the extent permitted by applicable law, pay a holder of the Securities an amount determined to be its fair market value

immediately before such termination notwithstanding such circumstances less the actual cost to the Issuer of unwinding any underlying related hedging arrangements.

#### Adjustments

The Issuer may make adjustments to the terms of the Securities if an event (such as a market disruption event or other circumstance affecting normal activities) which affects an underlying asset requires it. This may include (among other things) any event which has or may have a concentrating or diluting effect on the theoretical value of any underlying asset, including, without limitation, any cash dividend or other cash distribution, stock dividend, bonus issue, rights issue, or extraordinary dividends, or the insolvency of the issuer of the underlying asset, nationalisation of the assets of the issuer of the underlying assets and delisting or suspension of the underlying asset. The Issuer will not be under any obligation to consult with the holder of the Securities in such circumstances.

#### Market disruption

The Calculation Agent for the Securities may determine that a market disruption event has occurred or exists at a relevant time. Any such determination may affect the value of the Securities and/or delay settlement in respect of the Securities. A market disruption event is defined in the relevant terms and conditions of the Securities and includes (but is not limited to) Emerging Market Disruption Events, any suspension or limitation of trading on the Exchange or any Related Exchange, the declaration of a general moratorium in respect of banking activities in the country where the Exchange or any Related Exchange is located and the inability of the Issuer to unwind its hedge or related trading position relating to an underlying asset due to illiquidity. Upon the occurrence of Market Disruption Event, (as defined in the relevant terms and conditions of the Securities), the Calculation Agent may make adjustments to the terms and conditions of the Securities in order to account for such event if it considers it appropriate to do so. Investors should review the terms and conditions of the Securities to ascertain whether and how such provisions apply to the Securities.

#### FX market disruption

Investors should note that all payments on expiry or a secondary market purchase by the Issuer are subject to the ability of the Issuer to, amongst other things, : (i) sell the underlying asset(s); (ii) convert the currency of an underlying asset into the currency of the Securities; and/or (iii) transfer the currency of the Securities from accounts in the country where an underlying asset is located to accounts outside that country. The inability of the Issuer to perform any of the above may affect the value of the Securities and and/or delay settlement in respect of the Securities or, if it results in settlement being delayed for the period specified in the terms and conditions for the Securities (if any), may result in all obligations of the Issuer in respect of the Securities being extinguished.

#### Emerging markets

Investing in emerging markets involves certain risks and special considerations not typically associated with investing in other more established economies or securities markets. Such risks may include: (i) the risk of nationalisation or expropriation of assets or confiscatory taxation; (ii) social, economic and political uncertainty; (iii) dependence on exports and the corresponding importance of international trade and commodities prices; (iv) less liquidity of securities markets; (v) currency exchange rate fluctuations; (vi) potentially higher rates of inflation (including hyper-inflation); (vii) controls on investment and limitations on repatriation of invested capital; (viii) a higher degree of governmental involvement in and control over the economies; (ix) government decisions to discontinue support for economic reform programs and imposition of centrally planned economies; (x) differences in auditing and financial reporting standards which may result in the unavailability of material information about economics and issuers; (xi) less extensive regulatory oversight of securities markets; (xii) longer settlement periods for securities transactions; (xiii) less stringent laws regarding the fiduciary duties of officers and directors and protection of investors; and (xiv) certain consequences regarding the maintenance of portfolio securities and cash with sub-custodians and securities depositories in emerging market countries.

#### Emerging Market Disruption Event

Emerging Market Disruption Event means, unless otherwise specified in the terms and conditions of the relevant Securities each of the following events: (i) **Moratorium**. A general moratorium is declared in respect of banking activities in the country in which the Exchange or any Related Exchange is located or in the principal financial centre of the Relevant Currency; or (ii) **Price Source Disruption**. It becomes impossible to obtain the Relevant Currency Exchange Rate on any relevant date, in the inter-bank market; or (iii) **Governmental Default**. With respect to any security or indebtedness for money borrowed or guaranteed by any governmental authority, there occurs a default, event of default or other similar condition or event (howsoever described) including, but not limited to, (A) the failure of timely payment in full of principal, interest or other amounts due (without giving effect to any applicable grace periods) in respect of any such security indebtedness for money borrowed or guarantee, (B) a declared moratorium, standstill, waiver, deferral, repudiation or rescheduling of any principal, interest or other amounts due in respect of any such security, indebtedness for money borrowed or guarantee or (C) the amendment or modification of the terms and conditions of payment of any principal, interest or other amounts due in respect of any such security, indebtedness for money borrowed or guarantee without the consent of all holders of such obligation. The determination of the existence or occurrence of any default, event of default or other similar condition or event shall be made without regard to any lack or alleged lack of authority or capacity of such Governmental Authority to issue or enter into such security, indebtedness for money borrowed or guarantee; or (iv) **Inconvertibility/non-transferability**. The occurrence of any event which (A) generally makes it impossible to convert the currencies in the Relevant Currency Exchange Rate through customary legal channels for conducting such conversion in the principal financial centre of the Relevant Currency or (B) generally makes it impossible to deliver the Relevant Currency from accounts in the country of the principal financial centre of the Relevant Currency to accounts outside such jurisdiction or the Relevant Currency between accounts in such jurisdiction or to a party that is a non-resident of such jurisdiction; or (v) **Nationalisation**. Any expropriation, confiscation, requisition, nationalisation or other action by any Governmental Authority which deprives the Issuer (or any of its affiliates) of all or substantially all of its assets in the country of the principal financial centre of the Relevant Currency; or (vi) **Illiquidity**. It is impossible to obtain a firm quote for the Relevant Currency Exchange Rate for an amount which the Issuer considers necessary to discharge its obligations under the Securities; or (vii) **Change in Law**. A change in law in the country of the principal financial centre of the Relevant Currency which may affect the ownership in and/or the transferability of the Relevant Currency; or (viii) **Imposition of Tax/Levy**. The imposition of any tax and/or levy with punitive character which is imposed in the country of the principal financial centre of the Relevant Currency; or (ix) **Unavailability of Settlement Currency**. The unavailability of the Settlement Currency in the country of the principal financial centre of the Relevant Currency, or where the Settlement Currency is the Relevant Currency, the unavailability of the Relevant Currency in the principal financial centre of any other applicable currency; or (x) Any other event similar to any of the above, which could make it impracticable or impossible for the Issuer to perform its obligations in relation to the Securities. "**Relevant Currency**" means, unless otherwise specified in the terms and conditions of the Securities, the Settlement Currency, the lawful currency in which the underlying of the Security or any constituent of such underlying is denominated, from time to time, or the lawful currency of the country in which the Exchange or the primary exchange on which an underlying or any constituent of such underlying, is located provided that Relevant Currency shall not include any lawful currency that is a Standard Currency. Notwithstanding the foregoing, where the underlying of a Security is a fund, including but not limited to, an exchange traded fund, a mutual fund, a unit trust or a hedge fund, or an American Depositary Receipt ("**ADR**") or Global Depositary Receipt ("**GDR**"), the constituents of such fund, ADR or GDR as applicable, shall not be considered for the purpose of this definition; "**Relevant Currency Exchange Rate**" means each rate of exchange between the Relevant Currency and the Settlement Currency, or where the Relevant Currency is the Settlement Currency, between the Relevant Currency and any other applicable currency, as determined by the Calculation Agent by reference to such sources as the Calculation Agent may reasonably determine to be appropriate at such time; "**Standard Currency**" means, unless otherwise specified in the terms and conditions of the Securities, the lawful currency of Australia, Austria, Belgium, Canada, Cyprus, Denmark, Finland, France, Germany, Greece, Hong Kong, Ireland, Italy, Japan, Luxembourg, Malta, the

Netherlands, New Zealand, Norway, Portugal, Singapore, Slovenia, Spain, Sweden, Switzerland, Taiwan, the United Kingdom and the United States, or such other currency as determined by the Calculation Agent at its sole and absolute discretion from time to time.

#### Certificates

Certificates are investment instruments which, at maturity or expiration either pay an amount equal to the level of the underlying asset(s) or deliver the underlying asset(s) according to the redemption formula, subject to the certificate entitlement, foreign exchange rate and expenses. As such, they entail the same level of risk as a direct investment in the underlying asset(s). Investors should be aware that their entire investment may be lost, in the event that the underlying asset(s) are valued at zero. However, unlike direct investments, since Certificates have a limited term investors are not able to hold them beyond their stated maturity or expiration date in the expectation of a recovery in the price of the underlying asset(s). The price at which an investor will be able to sell Certificates prior to maturity or expiration may be at a substantial discount to the market value of the Certificates at the date on which the Investor purchased the Certificates, if, at such time and in addition to any other factors, the value of the underlying asset(s) is below, equal to or not sufficiently above the value of the underlying asset(s) at the issue date. If the underlying asset(s) is denominated in a currency different from the currency of denomination of the Certificates, the FX rate may affect the value of the Certificate. Past results do not guarantee and are not indicative of future performance. The value of each Certificate can fall as well as rise.

#### Open End Certificates

Open End Certificates are investment instruments which, at exercise or termination pay an amount equal to the level of the underlying asset(s) subject to the certificate entitlement, foreign exchange rate and expenses. As such, they entail a similar level of risk as a direct investment in the underlying asset(s). Investors should be aware that their entire investment may be lost, in the event that the underlying asset(s) is valued at zero. The investor should be aware that the Issuer is entitled to terminate the Open End Certificates under certain circumstances against payment of an early termination amount which may be substantially less than the market value of the Open End Certificates at the date on which the Investor purchased the Open End Certificates and in an extreme case, could be zero. In the event of termination, unlike direct investments, as the Open End Certificates now have a limited term, investors are not able to hold them beyond the termination date in the expectation of a recovery in the price of the underlying asset(s). The price at which an investor will be able to sell Open End Certificates prior to exercise or termination may be at a substantial discount to the market value of the Open End Certificates at the date on which the Investor purchased the Open End Certificates, if, at such time and in addition to any other factors, the value of the underlying asset(s) is below, equal to or not sufficiently above the value of the underlying asset(s) at the issue date. If the underlying asset(s) is denominated in a currency different from the currency denomination of the Open End Certificate, the FX rate may affect the value of the Open End Certificate. Past results do not guarantee and are not indicative of future performance. The value of each product can fall as well as rise.

#### Mini Long Certificates

Mini Long Certificates enable the investor to profit from rising markets. Mini Long Certificates are similar to ordinary certificates, in that they track in a linear manner the underlying asset(s). The difference between a Mini Long Certificate and an ordinary certificate is that in the case of the Mini Long Certificate, the amount needed to invest to give the same participation rate in the underlying asset(s) is considerably less. Therefore the percentage gain if the underlying asset(s) rises is much higher in Mini Long Certificates than in ordinary certificates. This is the leverage effect. Investors should be aware that the leverage effect from holding Mini Long Certificates could result in gaining or losing a greater percentage of the investment than would occur through a direct investment in the underlying asset(s). The maximum loss to the investor is the initial amount invested. Investors must expect to suffer a loss if the market price/value of the underlying asset(s) falls. A feature of Mini Long Certificates is the Stop-loss, which if breached will result in the early termination of the certificate. Investors should be aware that the Issuer might reset the Stop Loss Level of the Mini Long Certificates on a Stop loss reset date. Mini Long Certificates do not have a fixed maturity but the Issuer is entitled to terminate the certificates under certain circumstances against payment of the Termination Settlement Amount. If the underlying asset(s) is denominated in a currency different from the currency denomination of the Mini Long Certificate, the FX rate may affect the price of the value of the Mini Long Certificate. Where investments involve imbedded notional borrowings (leverage), the price of the investment will be determined not only by the trading price of the underlying asset(s) but also by the impact of financing costs and/or dividends during the period in which the certificates are held by the investor.

#### Emerging market currencies

have unique characteristics, trading behaviours and risk profiles not typically associated with investing in major foreign exchange currencies. Such risks may include, among others: (i) Economic Risk: economic conditions may change unexpectedly and rapidly; (ii) Political Risk: governments may have a more active role in emerging market countries; (iii) Economic Transparency: emerging market's economic policies and activities may not be transparent; (iv) Monetary System Risk: emerging market currencies may have different approaches to currency valuation i.e., free float, managed float or fixed rate; (v) Illiquidity Risk: there may be an illiquid market in the relevant currency as a result of the volume and activity of currency traded and the relevant bid and ask spreads; (vi) Price Source Risk: the risk that prices for the relevant currencies are absent or unreliable; (vii) Information Transparency Risk: timely and reliable information may be unavailable.

#### Stop loss Termination Event

A feature of the Security is a Stop-loss termination event, which will result in the early termination of the Security, if a specified threshold is breached. In such circumstances, the maximum loss to the investor will be the initial amount invested. Investors should be aware that the Issuer might reset the threshold level on the reset date.

Prior to making an investment decision, prospective investors should consider carefully, in light of their own financial circumstances and investment objectives: (i) all the information set forth in the Issuer's programme, as supplemented from time to time and, in particular, the considerations set forth therein under "Risk Factors"; and (ii) all the information set forth in the offering documents, base prospectus and/or final terms, as applicable, for the Securities. Prospective investors should make such enquiries as they deem necessary without relying on the Issuer of the Securities.
