1. Product Description

Product Category/Name

Participation Product/Tracker Certificate (1300, according to the "Swiss Derivative Map" provided by the Swiss Structured Products Association)

CISA Notification

This is a Structured Product. It does not constitute a collective investment scheme within the meaning of the Swiss Federal Act on Collective Investment Schemes (CISA) and it is not subject to authorisation or supervision by FINMA. The issuer risk is borne by investors.

Investment Profile

The composition of the Underlying of this Structured Product is managed **dynamically** and **discretionary** over the course of its term.

The Tracker Certificate Dynamic invests in German equities that are selected and managed using a rule-based investment concept. The investment objective is to absorb the higher stock market returns in positive trend phases but to limit negative market movements (drawdowns).

Further information about the investment strategy – if available – can be obtained free of charge from Zürcher Kantonalbank, Bahnhofstrasse 9, 8001 Zürich, department VRIE or by way of e-Mail address documentation@zkb.ch.

Title Universe	The relevant stock universe consists of shares of German companies traded on the Deutsche Börse (HDAX), which have a market capitalization of more than EUR 2 billion due to liquidity reasons. The underlying constituents are listed at a recognized exchange (World Federation of Exchanges or FESE (Federation of European Securities Exchanges)). The current composition of the Underlying can be found under www.zkb.ch/strukturierteprodukte .
Rebalancing	The Investment Manager rebalances the portfolio composition based on its qualified evaluation of the market. The Winterthur Consulting Group (WCG) stock selection model is used to analyse the attractiveness of stocks by means of trend analysis and risk assessment and to select them up to a maximum number of 25. The WCGROB management concept then controls the tactical weighting of the individual stock selection positions. If the selection results in less than 25 shares or if the management does not result in the full weighting per position, the Tracker Certificate Dynamic is not fully invested. In critical market phases, the investment ratio in equities in the Tracker Certificate Dynamic can be dynamically reduced to 0%. The Investment Manager ensures at all times that the cash quota never exceeds 50% of the certificate value. At the same time, they can also invest in one or more ETF bonds. The duration of the ETF must be at least 1 year. The ETF must also have a CH distribution licence. The Investment Manager considers only stocks which provide sufficient liquidity and tradability. The Rebalancing is based on net prices of the Underlyings (average of the net prices of the underlyings converted into the basket currency by the Issuer). The current basket composition of the Underlying is listed in the Annex to this termsheet.
